Graduate Student
Aerospace Engineering and Engineering Mechanics
The University of Texas at Austin

Austin, TX, June 2022

Slide with Text and Image

- List item 1
- List item 2
- List item 3

Main Section

One Column Slide

$$a(x_1,x_2)\frac{\partial^2 u}{\partial x_1^2}+b(x_1,x_2)\frac{\partial^2 u}{\partial x_1 \partial x_2}+c(x_1,x_2)\frac{\partial^2 u}{\partial x_2^2}+d(x_1,x_2)\frac{\partial u}{\partial x_1}+e(x_1,x_2)\frac{\partial u}{\partial x_2}+f(x_1,x_2)u=g(x_1,x_2)$$

- The PDE is called "elliptic" if

$$b^2-4ac<0$$

- The PDE is called "hyperbolic" if

$$b^2-4ac>0$$

- The PDE is called "parabolic" if

$$b^2-4ac=0$$

Slide with Two Columns*

- List item 1
- List item 2 with equation

$$f(\cdot) :^{n} \rightarrow$$

- Sublist:
  - One
  - Two
  - Three

- List item 1
- List item 2 with equation

$$f(\cdot) :^{n} \rightarrow$$

- Sublist:
  - One
  - Two
  - Three

Conclusion and Future Work

- I did this
- I did that
- Next steps:
  - I will do A
  - I will also do B

My Main Point

This is an emphasized text box.

The University of Texas at Austin
Aerospace Engineering
and Engineering Mechanics
Cockrell School of Engineering
